

JUNIOR EXPERT OFFICE SPECIALIZED IN AGROFORESTRY

○ WHAT IS SILVA EXPERTISE?

SILVA Expertise is a junior expertise office made up of 10 future engineers from ISTOM, a school specialized in agronomy and international development.

From left to right: Judith; Sacha; Chloe; Jules; Marie; Julien; Jeanne; Pauline; Matteo; Leana

○ OUR EXPERTISE PROJECT

Our project aims to promote a return to **AGRO-SYLVO-PASTORAL** balance. We mobilize the scientific approach of **AGROFORESTRY** to implement resilient agricultural practices that are compatible with the lifestyles and values of the inhabitants.

As part of an educational exercise, we propose a structural, functional, socio-economic, or ecological study that is part of a development project for which we will establish a **CO-CONSTRUCTION** methodology with the project sponsor and stakeholders.

International Mobility - Specialization in tropical areas

○ OUR SERVICES

In collaboration with a research center, a group of producers, a local authority, a company, an association, or another organization, we are able to carry out a field study on agroforestry:

- Post-project evaluation
- Impact study
- Feasibility study
- Market or sector study
- Territorial, agricultural, environmental diagnosis

○ WHAT MAKES THE DIFFERENCE

A large deployment force: possibility of carrying out the study on **very large areas** (several countries).

The ability to make **deliverables** upstream and downstream of the field step.

Close collaboration with ISTOM **teacher-researchers** specialized in agroforestry, tropical agronomy, sociology, economics and zootechnics.

Junior experts with various **international field experiences**.

An office with a **competitive price**.

January 2020 - January 2021

January - April 2021

May - June 2021

Mission statement

Setting up of office
Backers search
Fund raising

Preparation

Setting up of project
Elaboration of methodology

Step of the field work

Field expertise (1 to 2 months)
Data gathering

Feedback

Analysis of results
Writing and rendering of deliverables

○ OFFICE'S MEMBERS

BARBER Marie:

Marie's analytical mind enables her to quickly identify a problem and find solutions.

BROSSAT Pauline:

Also a graduate in Chemistry, Pauline is at ease with numbers and has a logical mind and a good memory.

BUREAU DU COLOMBIER Judith:

Very good listener and understanding, Judith knows how to put herself in the other person's shoes and understand a different point of view.

COUTANT Léana:

A traveller and dreamer at heart, Léana is not afraid to confront the difficulties of the terrain and moreover possesses great creativity.

DELABRE Matteo:

Matteo knows how to put his experience in the field to good use. Agroecology and the implementation of resilient practices are important for him.

GUINARD Jules:

Jules has a great social ease and his sense of involvement in his associative and professional projects is remarkable.

JACQUES Chloé:

Invested in her projects and force of proposals, Chloé knows how to use her memory, her logic, and her sense of organisation in her work.

LIQUIER Jeanne:

Observant, Jeanne has excellent organizational skills. As a mediator, she knows how to integrate everyone's opinions into the discussion.

PUECH Sacha:

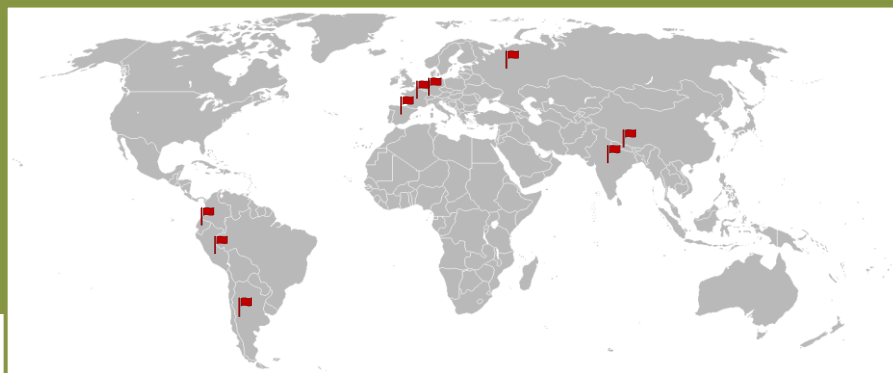

Sacha has a strong interest in agriculture and forestry; his scientific readings and his field experience are very useful to the group.

SABATIER Julien:

Curious and provided with an excellent interpersonal skill, Julien likes to learn about innovative ideas for resilient agriculture and is interested in socio-economic issues.

DIVERSE INTERNATIONAL EXPERIENCES
